DETAILED ACTION

Response to Amendment

1. This action is responsive to the Amendment After Final filed on 22 November 2004. Claims 1, 5-7, 9, 12-14 and 21 are amended. Claims 2, 3, 22 and 23 are canceled. No new claims are added. Claims 1 and 4-21 are currently pending in the application.

Response to Arguments

2. Applicant's arguments, see pages 7-10, filed 22 November 2004, with respect to claims 1 and 4-21 have been fully considered and are persuasive. The rejections/objections of claims 1 and 4-21 have been withdrawn.

The Applicant's primary argument is that U.S. Patent No. 4,691,986 to Aberson, Jr. et al. does not disclose fiber optic indicia to be formed on the end face of the ferrule body as claimed in amended claims 1, 9 and 21. The Applicant also argues that placing the identifying information suggested by the Aberson, Jr et al. reference on the end faces of the ferrule would defeat the utility of the information. The examiner respectfully agrees that the Aberson, Jr et al. reference does not disclose does not disclose fiber optic indicia formed on the end face of the ferrule body and that it would not be obvious to do so based on the teachings of the reference. Based on the amendment and arguments, the examiner now believes that claims 1 and 4-21 allowable over the prior art.

Allowable Subject Matter

3. Claims 1 and 4-21 are allowed.
